

Healthcare Is a Human Right!

Lobby Day in Albany - Tues, May 21

Join New Yorkers to demand a **healthcare** system that works for **patients, not profits**. Under a state single-payer health care program (A5389 - Gottfried) / (S2078 - Perkins), every New Yorker would receive quality health care and be able to choose their medical provider. "Single-Payer" means one program pays all bills, like Medicare. Benefits would include medically necessary health services including preventative and primary care, hospital care, dental, eye care, prescription drugs, mental health, and rehabilitative care. Coverage would be provided without regard to age, income, health or employment status. There would be no out-of-pocket charges for individuals - no co-pays, deductibles or premiums. **In the past 6 weeks, 24 new cosponsors have signed on to the legislation with only 2 more needed to pass the Assembly!**

Transportation will leave from Manhattan, Brooklyn, and the Bronx.
