CONTRACT RALLY TIME TO POWER UP

National Grid, despite huge world-wide corporate profits and record executive compensation and other perks, has rejected our proposals for a fair and reasonable wage increase, for better on-the-job safety protocols and for the maintenance of our current health care benefits.

National Grid, in response, has demanded either **5 YEARS OF ZERO WAGE INCREASES** or huge increases in out-of-pocket healthcare contributions. The union has rejected these demands.

Our negotiations are stalled and National Grid's unreasonable demands jeopardize any chances of reaching a settlement before the contract runs out on October 15, 2014!

It is vital that EVERY MEMBER be present to show support for a fair contract. No excuses. If you want a good contract . . . If you want to hold on to your benefits . . . Then BE THERE!

October 9, 2014
1 Metro Tech Center 5pm-9pm

Buses to the rally will be provided at our major work locations. Call our Bus Captains to say that you will be on the bus.
